Stillbirths only.
Age and Sex only.
Induced abortions reported by law.
Provisional data.
Legitimate live birth only.
ICD-9.
Demographic indicators not available for 1984 until Population Estimate is published.

Psychiatric units from general hospitals are excluded.
When data are published separately.
Separate statistics are available for more categories of discharges.

Sample size shown is for latest survey conducted unless otherwise stated.

List of Agencies

Australia:

(vital and survey statistics)
Australian Bureau of Statistics
P.O. Box 10
Belconnen, AUSTRALIA 2616

(hospital statistics)
Commonwealth Department of Health
P.O. Box 100
Woden, AUSTRALIA 2606

Austria:

(all statistics)
Department of Population Statistics
Austrian Central Statistical Office
Hintere Zollamtsstrasse 2b
A-1033 Vienna, AUSTRIA

Belgium:

(vital and hospital statistics)
Director General
Institut National de Statistique
Ministère des Affaires Economiques
Rue de Louvain, 44
1000 Bruxelles, BELGIUM

Federal Statistical Office
Kneza Milosa 20
P.O.B. 203
11000 Belgrade, YUGOSLAVIA

This second edition of the International Health Data Reference Guide provides information collected in mid-1985 on the availability of selected national vital, hospital, and population-based health survey statistics. Information for the 24 nations included in this guide was obtained from government and official agencies, which are listed in the guide for further reference.

The main purpose of the guide is to provide information not readily available in published form. The guide is not designed to provide information on the availability of measures considered to be universally documented such as crude birth and death rates or life expectancy at birth. A secondary purpose of the guide is to support the World Health Organization's goal of developing a common basis for international data comparison.

The reader should note the following qualifications concerning the availability of data in several countries. Austria has no reporting system for legal abortions. However, summary data are partly available in hospital discharge statistics under diagnosis of "miscarriage and abortion". Although no national hospital statistics are produced in Australia, Belgium, Czechoslovakia, and Greece do not produce many Australian states. Belgium, Czechoslovakia, and Greece do not produce national population-based survey statistics. However, some national level surveys of particular sub-population groups are conducted by various institutions. Financial data are not included in actual French hospital surveys. Switzerland does not produce official data for infant deaths by birthweight. Also, there are no comparable data covering all hospitals in Switzerland as reporting is not compulsory.

The user of this guide is encouraged to contact the listed government and official agencies to obtain specific data.

This reference guide is published by
